

## FIRE EXITS AND ASSEMBLY POINTS

The floor plan below indicates the fire exits, smoke and carbon monoxide detectors throughout the properties. For the 3 bedroom lodges, it is recommended that in the event of a fire guests use the ground floor exit doors to escape. Where this is not possible, the balconies should be used. In addition to the smoke and carbon monoxide detectors, fire blankets have been provided in the kitchen areas. All fire alarms within the property are set to a high volume and have a flashing light for hearing/visually impaired guests. We recommend all guests to have their own personal emergency evacuation plan in place.

→ = Fire Exit    S = Smoke Detector    CO = Carbon Monoxide Detector
