

Mountain Hare Apartment

Important note regarding the heating control in Mountain Hare Apartment and Osprey Apartment

The master control for the heating system is located within the ground floor kitchen (Mountain Hare Apartment).

This **MUST** be left on zone 1 @ all times. **DO NOT** switch over to zone 2 as this will affect the heating on the first floor (Osprey Apartment).

There is a wi-fi link between the ground floor cylinder cupboard and the first-floor stat. This will be overridden by the master control if tampered with.
